

PhD my journey!

Requirements of whom needed } regular path

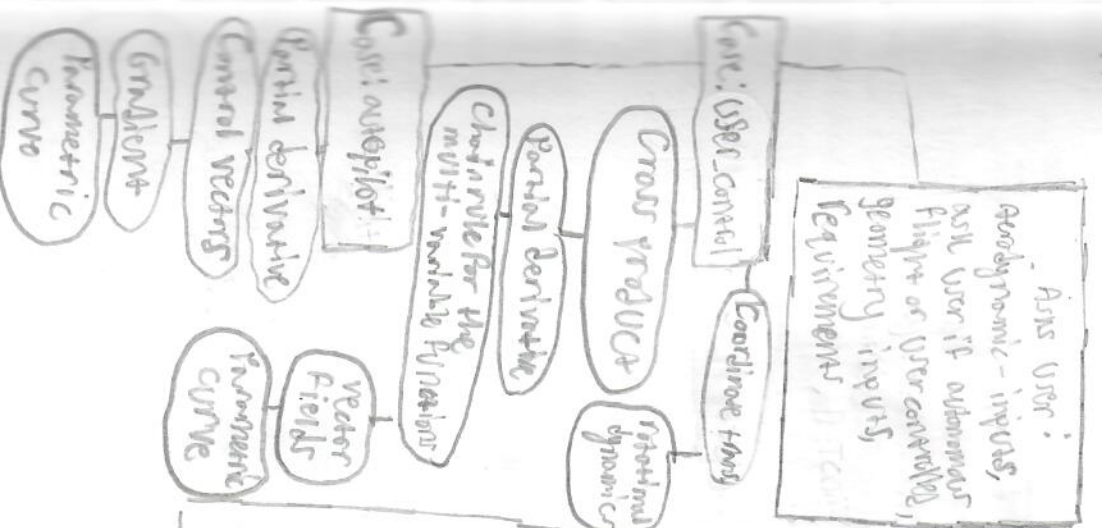

- join research adviser
- = graduate EB course
- = research with adviser
- Pass PhD qualifying exam
- Absorb dissertation research question
- Produce results from research
- Publish journal/conference paper
- = form dissertation committee
- Present dissertation proposal
- Pass general exam
- Continue dissertation research
- Publish more if appropriate
- Write dissertation
- Submit dissertation draft to your committee
- Give final dissertation defense
- Submit final dissertation to UJVP

6 DoF logic flow chart - General Idea of Calc 3

Winton Rickman

04/10/26

V1.00

1. Environment
2. Aircraft model
3. Aircraft subsystems: propulsion, actuation, sensors which connects with navigation, guidance, & autopilot
4. Aircraft configuration: landing gear, flap position, wing sweep, fuel quantity & burn, roll locks, changing modes & etc range
5. 6DoF dynamics: Translational eqn of motion, rotational eqn of motion & forces & moments from aerodynamics, propulsion, etc.
6. Kinematics: Euler angle, quaternion, & coordinate transformation, & position eqn.
7. Initialization
